ATMIYA UNIVERSITY, RAJKOT Master Of Computer Application, CGPA: 8.92/10	2023 - 2025

SKILLS

- PHP
- PYTHON
- BOOTSTRAP
- ANDROID

WORK EXPERIENCE

IMBUESOFT LLP

Worked as a **Python Developer** at **Imbuesoft LLP**, applying expertise in Django to build and maintain scalable web applications. Collaborated with team members to analyze requirements, design solutions, and implement new features. Ensured code quality through unit testing and resolved technical issues for smooth application performance.

PROJECTS

• AIRLINES RESERVATION SYSTEM

Built an Airlines Reservation System with features for booking, modifying, and canceling flights. Integrated database management for storing passenger and flight details. Enhanced efficiency with automated seat allocation and real-time updates.

Tech Stack: PHP | MySQL | HTML | CSS | JavaScript

• PIZZA POINT

Overall, this project is being developed to provide an E-commerce website to customers for their convenience. The main aim of creating this project is for an E-commerce forecasting system to make a website which can provide all the details to customers.

Tech Stack: ASP.NET | C#

- **A DIGITAL PLATFORM FOR ACADEMIC PLANNING AND STUDENT SERVICES**

Developed a digital platform for academic planning and student services to automate scheduling, streamline administrative processes, and enhance user experience for students, faculty, and staff. The system provides centralized access to academic resources, improving efficiency and collaboration across the university.

Tech Stack : PYTHON | MySQL | HTML | CSS
